## Experience

### 2022-Till Date

#### WEB DEVELOPMENT

I embarked on my journey as a web developer in 2022 and have since shown an unwavering dedication to my craft. With a strong desire to excel, I immerse myself in the world of web development each day, fueled by a thirst for knowledge and a determination to stay current with the ever-evolving industry trends. My commitment to continuous learning is evident as I consistently explore new technologies, hone my coding skills, and embrace challenges as opportunities for growth. My passion for web development is not only evident in my projects but also in my eagerness to collaborate, innovate, and contribute to the digital landscape.

### 2021-Till Date

#### Android Studios

I began my journey as an Android developer in 2021, driven by a deep fascination for mobile technology and a passion for crafting intuitive user experiences. My projects in Android, primarily developed using the Java language, showcase my dedication to creating efficient and user-friendly applications. During my internship, I had the invaluable opportunity to immerse myself in real-world development scenarios, collaborating with experienced professionals and refining my skills. This experience not only expanded my technical prowess but also instilled in me a comprehensive understanding of the development lifecycle. As I continue to evolve in the Android ecosystem, I eagerly anticipate the challenges and innovations that lie ahead, and I am committed to consistently enhancing my abilities to create impactful and dynamic mobile applications.

## Personal projects

- Created a responsive Portfolio Website that showcase my web designing and development skills
- Created many android studio basic learning projects which have resulted in improved java skills and designing.
